

Framing Keywords

@default	Sets the default value for a property.
@embed	Always/never/one-time embed referenced nodes.
@explicit	Only include specifically stated properties.
@null	Allows non-existent properties to be represented as <code>null</code> .
@omitDefault	Override setting for default values.
@requireAll	Require all framed properties to be present to match.

Framing Improvements (embedding)

- `@embed: @last => @embed: @once (@never
& @always`
