

Framing Improvements (Named Graphs)

```
{  
  "@context": {"@vocab": "http://example.org/"},  
  "@type": "Library",  
  "contains": {  
    "@id": "http://example.org/graphs/books",  
    "@graph": {  
      "@type": "Book"  
    }  
  }  
}
```

```
@prefix rdf: <http://www.w3.org/1999/02/22-rdf-syntax-ns#> .  
@prefix v: <http://example.org/> .
```

```
[  
  a v:Library;  
  v:contains <http://example.org/graphs/books>  
] .
```

```
<http://example.org/graphs/books> {  
  [a v:Book] .  
}
```

- Outer is merged graph, unless frame includes `@graph`.

Framing Improvements (@id matching)

```
{
  "@context": {"ex": "http://example.org/"},
  "@id": ["ex:Sub1", "ex:Sub2"]
}
```

```
{
  "@context": {
    "@base": "http://example.org/",
    "@vocab": "http://example.org/vocab#",
    "@version": 1.1
  },
  "characters": {
    "format": {
      "char": {
        "@id": {},
        "states": {
          "@default": {}
        }
      }
    }
  }
}
```

- Selects any node with the selected identifier (or wildcard ({ }).
